## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/17/2009 has been entered.
2. Claims 9, 11, 16, 17, 21 and 23 are canceled.
3. Claims 1-8, 10, 12-15, 18-20, 22 and 24-29 are examined on the merits.
4. All outstanding art rejections are overcome by Applicant's amendments and remarks.

### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3761

6. Claims 1, 14 and 19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 6, 13 and 23 of Application No. 10/575870 (now patented, patent number to be determined). Although the conflicting claims are not identical, they are not patentably distinct from each other because all the elements of claims 1, 14 and 19 of the Application are to be found in claims 1, 16, 13 and 23 of 10/575870 except of means for supplying the thermal energy.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to supply the apparatus of 10/575870 with the means for supplying the thermal energy, since it was known in the art that the optimal temperature range of the metabolic processes lays within the range of the body temperature that provides the optimum regimen for healing process.
